REPORT OF THE DIRECTORS

FOR THE YEAR ENDED 31 DECEMBER 2013

The Directors have pleasure in presenting to the members their report together with the audited financial statements for the year ended 31 December 2013.

CORPORATE STRUCTURE AND BUSINESS

Principal activity and business review

Sterling Bank Plc, (formerly known as NAL Bank Plc) was the pioneer merchant bank in Nigeria, established on 25 November 1960 as a private limited liability company and was converted to a public limited liability company in April 1992.

Sterling Bank Plc is engaged in commercial banking with emphasis on consumer banking, trade services, corporate and investment banking activities. It also provides wholesale banking services including the granting of loans and advances, letter of credit transactions, equipment leasing, money market operations, electronic banking products and other banking activities.

Legal form

Following the consolidation reforms introduced and driven by the Central Bank of Nigeria in 2004, the Bank emerged from the consolidation of NAL Bank Plc, Indo-Nigerian Bank Limited, Magnum Trust Bank Plc, NBM Bank Limited and Trust Bank of Africa Limited. NAL Bank Plc as the surviving bank adopted a new name for the enlarged entity, 'Sterling Bank Plc'. The enlarged bank commenced post merger business operations on 3 January 2006 and the Bank's shares are currently quoted on the Nigerian Stock Exchange (NSE).

In October 2011, the Bank had a business combination with Equitorial Trust Bank Limited to re-position itself to better compete in the market space. The enlarged entity as at the integration had an expanded branch network of 186 branches.

In compliance with the CBN guidelines on the review of the Universal Banking model, the Bank divested its four (4) subsidiaries and one associate company on 30 December 2011.

FOR THE YEAR ENDED 31 DECEMBER 2013

Employment and employees

Employment of disabled persons:

The Bank has a non-discriminatory policy on recruitment. Applications would always be welcomed from suitably qualified disabled persons and are reviewed strictly on qualification. The Bank's policy is that the highest qualified and most experienced persons are recruited for appropriate job levels irrespective of an applicant's state of origin, ethnicity, religion or physical condition.

Health, safety and welfare of employees:

Health and safety regulations are in force within the Bank's premises and employees are aware of existing regulations. The Bank provides subsidies to all levels of employees for medical expenses, transportation, housing, lunch, etc.

Employee training and development:

The Bank is committed to keeping employees fully informed as much as possible regarding the Bank's performance and progress and seeking their opinion where practicable on matters which particularly affect them as employees.

Training is carried out at various levels through both in-house and external courses. Incentive schemes designed to encourage the involvement of employees in the Bank's performance are implemented whenever appropriate.

Events after the reporting date

There were no events after reporting date which could have had a material effect on the state of affair of the Bank as at 31 December 2013 or the profit for the year ended on that date which have not been adequately provided for or disclosed.

Auditors

Messrs Ernst & Young have indicated their willingness to continue in office as auditors of the Bank in accordance with Section 357(2) of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004.

BY ORDER OF THE BOARD:

Justina Lewa Company Secretary (FRC/2013/NBA/0000001255) 20 Marina, Lagos, Nigeria. 4 March **2014**

Management Committees

1. Executive Committee (EXCO)

The Committee provides leadership to the management team and ensures the implementation of strategies approved by the Board. It deliberates and takes decisions on the effective and efficient management of the Bank.

2. Assets and Liability Committee (ALCO)

The Committee ensures adequate liquidity and the management of interest rate risk within acceptable parameters. It also reviews the economic outlook and its impact on the Bank's strategies.

3. Management Credit Committee (MCC)

The Committee approves new credit products and initiatives, minimum/prime lending rate and reviews the credit policy manual. It approves exposures up to its maximum limit and the risk asset acceptance criteria.

4. Management Performance Review Committee (MPR)

The Committee reviews the Bank's monthly performance on set targets and monitors budget achievement. It also assesses the efficiency of resource deployment in the Bank and re-appraises cost management initiatives.

5. Criticised Assets Committee (CAC)

The Committee reviews the Bank's credit portfolio and collateral documentation. It reviews the non-performing loans and recovery strategies for bad loans.

CORPORATE GOVERNANCE REPORT- Continued

FOR THE YEAR ENDED 31 DECEMBER 2013

6. Computer Steering Committee (CSC)

The Committee establishes the overall technology priorities by identifying projects that support the Bank's business plan. It provides guidance in effectively utilizing technology resources to meet business and operational needs of the Bank.

7. Management Risk Committee (MRC)

The Committee is responsible for planning, management and control of the Bank's overall risks. It includes setting the Bank's risk philosophy, risk appetite, risk limits and risk policies.

Succession Planning

Sterling Bank Plc has a Succession Planning Policy which was approved by the Board of Directors in 2009. Succession Planning is aligned to the Bank's overall organisational development strategy. In line with this policy, a Unit was set-up in the Human Resource Management Group to implement, amongst others, a Succession Plan for the Bank.

Successors are nominated based on experience, skills and competencies through an automated process by current role holders in conjunction with the Human Resource Management Group. Development initiatives have also been put in place to accelerate successors' readiness.

CORPORATE GOVERNANCE REPORT- Continued

FOR THE YEAR ENDED 31 DECEMBER 2013

Code of Ethics

Sterling Bank has a Code of Ethics that specifies acceptable behavior of its staff, in the staff handbook. It is a requirement that all staff should sign a confirmation that they have read and understood the document upon employment.

The Bank also has a Sanctions Manual which provides sample offences/violation and prescribes measures to be adopted in various cases. The Head of Human Resource Management is responsible for the implementation and compliance to the "Code of Ethics".

Whistle Blowing Process

The Bank is committed to the highest standards of openness, probity and accountability hence the need for an effective and efficient whistle blowing process as a key element of good corporate governance and risk management.

Whistle blowing process is a mechanism by which suspected breaches of the Bank's internal policies, processes, procedures and unethical activities by any stakeholder (staff, customers, suppliers and applicants) are reported for necessary actions.

It ensures a sound, clean and high degree of integrity and transparency in order to achieve efficiency and effectiveness in our operations.

The reputation of the Bank is of utmost importance and every staff of the Bank has a responsibility to protect the Bank from any persons or act that might jeopardize its reputation. Staff are encouraged to speak up when faced with information that would help protect the Bank's reputation.

An essential attribute of the process is the guarantee of confidentiality and protection of the whistle blower's identity and rights. It should be noted that the ultimate aim of this policy is to ensure efficient service to the customer, good corporate image and business continuity in an atmosphere compliant with best industry practice.

The Bank has a Whistle Blowing channel via the Bank's website, dedicated telephone hotlines and e-mail address in compliance with Section 6.1.12 of the Central Bank of Nigeria (CBN) Code of Corporate Governance for Banks in Nigeria Post Consolidation.

The Bank's Chief Compliance Officer is responsible for monitoring and reporting on whistle blowing.

STATEMENT OF DIRECTORS' RESPONSIBILITY IN RELATION TO THE FINANCIAL STATEMENTS

FOR THE YEAR ENDED 31 DECEMBER 2013

In accordance with the provisions of Sections 334 and 335 of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, and Sections 24 and 28 of the Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004, the Directors are responsible for the preparation of financial statements which present fairly, in all material respects, the financial position of the Bank, and of the financial performance for the year. The responsibilities include ensuring that:

- appropriate internal controls are established both to safeguard the assets of the Bank and to prevent and detect fraud and other irregularities;
- (b) the Bank keeps accounting records which disclose with reasonable accuracy the financial position and performance of the Bank and which ensure that the financial statements comply with the requirements of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004, Revised Prudential Guidelines, International Financial Reporting Standards and relevant circulars issued by the Central Bank of Nigeria;
- (c) the Bank has used appropriate accounting policies, consistently applied and supported by reasonable and prudent judgments and estimates

The Directors accept responsibility for the annual financial statements, which have been prepared using appropriate accounting policies supported by reasonable and prudent judgments and estimates in conformity with International Financial Reporting Standards, the requirements of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004, Revised Prudential Guidelines, and relevant circulars issued by the Central Bank of Nigeria.

The Directors are of the opinion that the financial statements present fairly, in all material respects, the financial position and the financial performance of the Bank as of and for the year ended 31 December 2013.

The Directors further accept responsibility for the maintenance of accounting records that may be relied upon in the preparation of the financial statements, as well as adequate systems of financial control.

Nothing has come to the attention of the Directors to indicate that the Bank will not remain as a going concern for at least twelve months from the date of this statement.

Signed on behalf of the Directors by:

STERLING BANK PLC

REPORT OF THE AUDIT COMMITTEE

FOR THE YEAR ENDED 31 DECEMBER 2013

TO THE MEMBERS OF STERLING BANK PLC:

In accordance with the provision of Section 359 (6) of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, the members of the Audit Committee of Sterling Bank Plc hereby report as follows:

- We are of the opinion that the accounting and reporting policies of the Bank are in accordance with International Financial Reporting Standards and legal requirements and agreed ethical practices
- We believe that the scope and planning of both the external and internal audits for the year ended 31 December 2013 were satisfactory and reinforce the Bank's internal control systems.
- We have deliberated with the External Auditors, who have confirmed that necessary co-operation was received from
 management in the course of their audit and we are satisfied with the management's response to the External Auditor's
 recommendations on accounting and internal control matters.
- The Internal Control and Internal Audit functions were operating effectively.
- We have exercised our statutory functions under Section 359 (6) of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, and acknowledge the co-operation of management and staff in the conduct of these responsibilities.

We are satisfied that the Bank has complied with the provision of the Central Bank of Nigeria Circular BSD/1/2004 dated 18 February 2004 on "Disclosure of Directors' related credits in the financial statements of banks", we reviewed insider-related credits of the Bank and found them to be as analysed in the financial statements. The status of performance of these facilities is disclosed in note 37 to the financial statements.

Alhaji Mustapha Jinadu
Chairman, Audit Committee 25 February 2014

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF STERLING BANK PLC

Report on the financial statements

We have audited the accompanying financial statements of Sterling Bank Plc, which comprise the statement of financial position as at 31 December 2013, the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year ended, and a summary of significant accounting policies and other explanatory notes.

Directors' responsibility for the financial statements

The Directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and the provisions of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, the Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004, the Financial Reporting Council Act No. 6, 2011 and relevant Central Bank of Nigeria circulars and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Sterling Bank Plc as at 31 December 2013, and its financial performance and cash flows for the year ended in accordance with International Financial Reporting Standards, and the provisions of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, the Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004, the Financial Reporting Council Act No. 6, 2011 and relevant Central Bank of Nigeria circulars.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF

STERLING BANK PLC - Continued

Report on Other Legal and Regulatory Requirements

In accordance with the requirement of Schedule 6 of the Companies and Allied Matters Act, CAP C20 Laws of the Federation of Nigeria 2004, we confirm that:

- i) we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
- ii) in our opinion, proper books of account have been kept by the Bank, so far as it appears from our examination of those books:
- iii) the Bank's balance sheet (statement of financial position) and statement of profit and loss (statement of comprehensive income) are in agreement with the books of account.

In compliance with the Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004 and circulars issued by Central Bank of Nigeria:

- i) We confirm that our examination of the loans and advances was carried out in accordance with the Prudential Guidelines for licensed banks issued by the Central Bank of Nigeria.
- ii) Related party transactions and balances are disclosed in Note 37 to the financial statements in compliance with the Central Bank of Nigeria circular BSD/1/2004.
- iii) Customer complaints are disclosed in Note 40 to the financial statements in compliance with the Central Bank of Nigeria circular FPR/DIR/CIR/01/020.
- iv) As disclosed in Note 39 to the financial statements the Bank contravened certain provisions of the Banks and Other Financial Institutions Act, CAP B3 Laws of the Federation of Nigeria 2004 and certain Central Bank of Nigeria circulars.

STERLING BANK PLC

STATEMENT OF PRUDENTIAL ADJUSTMENTS

FOR THE YEAR ENDED 31 DECEMBER 2013

The Central Bank of Nigeria, the banking regulatory body, stipulates that impairment provisions recognized in the profit or loss account shall be determined based on the requirements of International Financial Reporting Standards ("IFRS"). The IFRS impairment provisions should be compared with provisions determined under prudential guidelines and the expected impact/changes in Retained Earnings should be treated as follows:

- (i) Prudential impairment provision is greater than IFRS impairment provision; transfer the difference from the Retained Earnings to a non-distributable Regulatory Risk Reserve.
- (ii) Prudential impairment provision is less than IFRS impairment provision; the excess charges resulting should be transferred from the Regulatory Risk Reserve account to the Retained Earnings to the extent of the non-distributable reserve previously recognized.

Tooginzou.	As of 31 December 2013 N'000	As of 31 December 2012 N'000

NOTES TO THE FINANCIAL STATEMENTS

1. Corporate information

Sterling Bank Plc (the Bank) is a public limited liability company incorporated and domiciled in Nigeria. The Bank's shares are listed and traded on the floor of the Nigerian Stock Exchange. Its registered office is located at Sterling Towers, 20 Marina, Lagos, Nigeria.

The Bank is principally engaged in investment, corporate, commercial and retail banking.

The financial statements of Sterling Bank Plc for the year ended 31 December 2013 were authorised for issue in accordance with a resolution of the Board of Directors on 4 March 2014.

2. Accounting Policies

2.1 Basis of preparation

The financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). For all periods up to and including the year ended 31 December 2011, the Bank prepared its financial statements in accordance with Nigerian Generally Accepted Accounting Principles (Nigerian GAAP). The financial statements for the year ended 31 December 2012 were the first financial statements the Bank has prepared in accordance with IFRS.

The financial statements have been prepared on a historical cost basis, except for available-for-sale investments, other financial assets and liabilities held for trading, as well as financial assets and liabilities designated at fair value through profit or loss, all of which have been measured at fair value.

The financial statements are presented in Nigerian Naira and all values are rounded to the nearest thousand (N'000) except when otherwise indicated.

(a) Statement of compliance

The financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the IASB.

(b) Presentation of financial statements

The Bank presents its statement of financial position in order of liquidity. An analysis regarding recovery or settlement within 12 months after the reporting date (current) and more than 12 months after the reporting date (non-current) is presented in note 36 to the financial statements.

The amendment to IAS 1 requires that items presented within other comprehensive income be grouped separately into those items that will be recycled into profit or loss at a future point in time, and those items that will never be recycled.

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expenses are not offset in the income statement unless required or permitted by any accounting standard or interpretation, and as specifically disclosed in the accounting policies of the Bank.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies

The following are the significant accounting policies applied by the Bank in preparing its financial statements:

2.2.1 Interest Income and Expense

For all financial instruments measured at amortised cost, interest bearing financial assets classified as available-for-sale and financial instruments designated at fair value through profit or loss, interest income and expense are recognised in profit or loss using the effective interest method. The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. When calculating the effective interest rate, the Bank estimates future cash flows considering all contractual terms of the financial instruments but not future credit losses.

The calculation of the effective interest rate takes into account contractual terms which includes prepayment options, claw-back, contractual fees and points paid or received, transaction costs, and discounts or premiums that are an integral part of the effective interest rate. Transaction costs include incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability.

Interest income and expense presented in the statement of comprehensive income include:

- interest on financial assets and liabilities measured at amortised cost calculated on an effective interest rate basis.
- interest on available-for-sale investment securities calculated on an effective interest basis.

Interest income and expense on all trading assets and liabilities are considered to be incidental to the Bank's trading operations and are presented together with all other changes in the fair value of trading assets and liabilities in net trading income.

2.2.2 Fees and commission

Fees and commission income and expense that are integral to the effective interest rate on a financial asset or liability are included in the measurement of the effective interest rate.

Other fees and commission income, including account servicing fees, investment management and other fiduciary activity fees, sales commission, placement fees and syndication fees, are recognised as the related services are performed. When a loan commitment is not expected to result in the draw-down of a loan, loan commitment fees are recognised on a straight-line basis over the commitment period.

Other fees and commission expense relates mainly to transaction and service fees, which are expensed as the services are received.

2.2.3 Net trading income

Net trading income comprises gains less losses related to trading assets and liabilities, and includes all realised and unrealised fair value changes, dividends and foreign exchange differences.

2.2.4 Dividend Income

Dividend income is recognised when the right to receive income is established. Usually this is the ex-dividend date for equity securities. Dividends on trading equities are reflected as a component of net trading income, net income from other financial instruments at fair value through profit and loss or other operating income based on the underlying classification of the equity investment. Dividend income on available-for-sale securities are recognised as a component of other operating income.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

2.2.5 Lease payments

Payments made under operating leases are recognised in profit or loss on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between the finance expense and the reduction of the outstanding liability. The finance expense is allocated to each period during the lease term so as to produce a constant periodic rate of interest on the remaining balance of the liability. Contingent lease payments are accounted for by revising the minimum lease payments over the remaining term of the lease when the lease adjustment is confirmed.

2.2.6 Taxes

Tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

(i) Current tax

Current tax is the expected tax payable on taxable income or loss for the year determined in accordance with the Companies Income Tax Act (CITA), using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

(ii) Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognised for the following temporary differences:

- The initial recognition of goodwill;
- The initial recognition of assets or liabilities in a transaction that is not a business combination and that affects profit or loss;
- Deferred tax is measured at the tax rates that are expected to be applied to the temporary differences when they have been enacted or substantively enacted by the reporting date.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities against current tax assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Additional income taxes that arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividend is recognised.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Current tax and deferred tax relating to items recognised directly in equity are also recognised in equity and not in profit or loss.

Tax assessments are recognized when assessed and agreed to by the Bank with the Tax authorities, or when appealed, upon receipt of the results of the appeal.

2.2.7 Financial assets and liabilities

Below are classes of items in the statement of financial position that are categorized under financial assets and liabilities.

(i) Initial recognition

The Bank initially recognises loans and advances, deposits, debt securities issued and liabilities on the date that they are originated. All other financial assets and liabilities (including assets and liabilities designated at fair value through profit and loss) are initially recognised on the trade date at which the Bank becomes a party to the contractual provisions of the instrument.

The classification of financial instruments at initial recognition depends on their purpose and characteristics and the management's intention in acquiring them. All financial instruments are measured initially at their fair value plus transaction costs, except in the case of financial assets and financial liabilities recorded at fair value through profit or loss.

(ii) Subsequent measurement

Subsequent to initial measurement, financial instruments are measured either at fair value or amortised cost, depending on their classification:

1. Financial assets held at fair value through profit and loss

This category has two sub-categories; financial assets held for trading, and those designated at fair value through profit or loss at inception. A financial asset is classified as trading if acquired principally for the purpose of selling in the short term. Derivatives are also categorised as trading unless they are designated as hedges.

Financial assets may be designated at fair value through profit or loss when:

- the designation eliminates or significantly reduces measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities on different basis; or
- group of financial assets is managed and its performance evaluated on a fair value basis.

Subsequent to initial recognition, the fair values are re-measured at each reporting date. All gains and losses arising from changes therein are recognised in the profit or loss in 'net trading income' for trading assets, and in 'net income from other financial instruments carried at fair value' for financial assets designated at fair value through profit or loss at inception.

Interest earned and dividends received while holding trading assets at fair value through profit or loss are included in net trading income. Trading assets are not reclassified subsequent to their initial recognition.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

2. Available-for-sale

Available-for-sale investments are non-derivative investments that were designated by the Bank as available-for-sale or are not classified as another category of financial assets, or strategic capital investments held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices. Unquoted equity securities whose fair value cannot reliably be measured were carried at cost. All other available-for-sale investments were carried at fair value.

Interest income is recognised in profit or loss using the effective interest method. Dividend income is recognised in the profit or loss when the Bank becomes entitled to the dividend. Foreign exchange gains or losses on available-for-sale debt security investments are recognised in profit or loss. Other fair value changes are recognised in other comprehensive income until the investment is sold or impaired, whereupon the cumulative gains and losses previously recognised in other comprehensive income are reclassified to profit or loss as a reclassification adjustment.

A non-derivative financial asset may be reclassified from the available-for-sale category to the loans and receivables category if it otherwise would have met the definition of loans and receivables and if the Bank has the intention and ability to hold that financial asset for the foreseeable future or until maturity.

3. Held-to-maturity

Held-to-maturity investments are non-derivative assets with fixed determinable payments and fixed maturities that the Bank has the positive intent and ability to hold to maturity.

Held-to-maturity investments are carried at amortised cost, using the effective interest method. A sale or reclassification of a more than insignificant amount of held-to-maturity investments would result in the reclassification of all held-to-maturity investments as available-for-sale, and would prevent the Bank from classifying investment securities as held-to-maturity for the current and the following two years. However, sales and reclassifications in any of the following circumstances would not trigger a reclassification:

- sales or reclassifications that are so close to maturity that changes in the market rate of interest would not have a significant effect on the financial asset's fair value;
- sales or reclassifications after the Bank has collected substantially all of the asset's original principal; and
- sales or reclassifications attributable to non-recurring isolated events beyond the Bank's control that could not have been reasonably anticipated.

4. Loans and advances

Loans and advances are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the Bank does not intend to sell immediately or in the near term.

Loans and advances are initially measured at fair value plus incremental direct transaction costs, and subsequently measured at their amortised cost using the effective interest method.

Loans and advances include loans granted to customers and corporate entities.

(iii) Amortised cost measurement

The amortised cost of a financial asset or liability is the amount at which the financial asset or liability is measured at initial recognition, minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount recognised and the maturity amount, minus any reduction for impairment.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

(iv) 'Day 1' profit or loss

When the transaction price differs from the fair value of other observable current market transactions in the same instrument, or based on a valuation technique whose variables include only data from observable markets, the Bank immediately recognises the difference between the transaction price and fair value (a Day 1 profit or loss) in Net trading income. In cases where fair value is determined using data which is not observable, the difference between the transaction price and model value is only recognised in the profit or loss when the inputs become observable, or when the instrument is derecognised.

(v) Fair value definition and measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of the fair value of a financial instrument on initial recognition is the transaction price, i.e. the fair value of the consideration paid or received, unless the fair value is evidenced by comparison with other observable current market transactions in the same instrument, without modification or repackaging, or based on discounted cash flow models and option pricing valuation techniques whose variables include only data from observable markets.

Subsequent to initial recognition, the fair values of financial instruments are based on quoted market prices or dealer price quotations for financial instruments traded in active markets. If the market for a financial asset is not active or the instrument is unlisted, the fair value is determined by using applicable valuation techniques. These include the use of recent arm's length transactions, discounted cash flow analyses, pricing models and valuation techniques commonly used by market participants.

Where discounted cash flow analyses are used, estimated cash flows are based on management's best estimates and the discount rate is a market-related rate at the reporting date from a financial asset with similar terms and conditions. Where pricing models are used, inputs are based on observable market indicators at the reporting date and profits or losses are only recognised to the extent that they relate to changes in factors that market participants will consider in setting price.

(vi) Derecognition of financial instruments

The Bank derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred, or has assumed an obligation to pay those cash flows to one or more recipients, subject to certain criteria.

Any interest in transferred financial assets that is created or retained by the Bank is recognised as a separate asset or liability.

The Bank derecognises a financial liability when its contractual obligations are discharged or cancelled or expire. The Bank enters into transactions whereby it transfers assets recognised on its statement of financial position, but retains either all risks or rewards of the transferred assets or a portion of them. If all or substantially all risks and rewards are retained, then the transferred assets are not derecognised from the statement of the financial position. In transactions where the Bank neither retains nor transfers substantially all the risks and rewards of ownership of a financial asset, it derecognises the asset if control over the asset is lost.

The rights and obligations retained in the transfer are recognised separately as assets and liabilities as appropriate. In transfers where control over the asset is retained, the Bank continues to recognise the asset to the extent of its continuing involvement, determined by the extent to which it is exposed to changes in the value of the transferred asset.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

(vii) Due from banks and loans and advances

Due from banks and Loans and advances include non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- Those that the Bank intends to sell immediately or in the near term and those that the Bank, upon initial recognition, designates as at fair value through profit or loss,
- Those that the Bank, upon initial recognition, designates as available-for-sale,
- Those for which the Bank may not recover substantially all of its initial investment, other than because of credit deterioration.

After initial measurement, amounts Due from banks and Loans and advances to customers are subsequently measured at amortised cost using the EIR, less allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees and costs that are an integral part of the EIR. The amortisation is included in Interest and similar income in the income statement. The losses arising from impairment are recognised in the statement of comprehensive income in impairment losses.

The Bank may enter into certain lending commitments where the loan, on drawdown, is expected to be classified as held for trading because the intent is to sell the loans in the short term. These commitments to lend are recorded as derivatives and measured at fair value through profit or loss.

Where the loan, on drawdown, is expected to be retained by the Bank, and not sold in the short term, the commitment is recorded only when it is an onerous contract that is likely to give rise to a loss (e.g., due to a counterparty credit event).

(viii) Debts issued and other borrowed funds

Financial instruments issued by the Bank that are not designated at fair value through profit or loss, are classified as liabilities under Debts issued and Other borrowed funds, where the substance of the contractual arrangement results in the Bank having an obligation either to deliver cash or another financial asset to the holder, or to satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

After initial measurement, debts issued and other borrowed funds are subsequently measured at amortised cost using the effective interest rate (EIR). Amortised cost is calculated by taking into account any discount or premium on the issue and costs that are an integral part of the EIR.

2.2.8 Impairment of financial assets

(i) Assets carried at amortised cost

The Bank assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the assets (a 'loss event'), and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

The following factors are considered in assessing objective evidence of impairment:

- whether the customer is more than 90 days past due:
- the Bank consents to a restructuring of the obligation, resulting in a diminished financial obligation, demonstrated material forgiveness of debt or postponement of scheduled payments; or
- there is an observable data indicating that there is a measurable decrease in the estimated future cash flows of a
 group of financial assets, although the decrease cannot yet be identified with specific individual financial assets.
 The Bank first assesses whether objective evidence of impairment exists individually for financial assets that are
 individually significant, and individually or collectively for financial assets that are not individually significant.

If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised, are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on a loan and receivable or a held-to-maturity asset has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred), discounted at the asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in profit or loss.

The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable. For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Bank's grading process which considers asset type, industry, geographic location, collateral type, past-due status and other relevant factors).

These characteristics are relevant to the estimation of future cash flows for groups of such assets being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based, and to remove the effects of conditions in the historical period that do not exist currently.

To the extent a loan is irrecoverable, it is written off against the related allowance for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. Subsequent recoveries of amounts previously written off decrease the amount of the allowance for loan impairment in profit or loss. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

(ii) Available-for-sale financial assets

Available-for-sale financial assets are impaired if there is objective evidence of impairment, resulting from one or more loss events that occurred after initial recognition but before the reporting date, that have an impact on the future cash flows of the asset. In addition, an available-for-sale equity instrument is generally considered impaired if a significant or prolonged decline in the fair value of the instrument below its cost has occurred. Where an available-for-sale asset, which has been remeasured to fair value directly through equity, is impaired, the impairment loss is recognised in profit or loss. If any loss on the financial asset was previously recognised directly in equity as a reduction in fair value, the cumulative net loss that had been recognised in equity is transferred to profit or loss and is recognised as part of the impairment loss. The amount of the loss recognised in profit or loss is the difference between the acquisition cost and the current fair value, less any previously recognised impairment loss.

If, in a subsequent period, the amount relating to an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised in the income statement, where the instrument is a debt instrument, the impairment loss is reversed through profit or loss. An impairment loss in respect of an equity instrument classified as available-for-sale is not reversed through profit or loss but accounted for directly in equity.

(iii) Renegotiated loans

Where possible, the Bank seeks to restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original effective interest rate (EIR) as calculated before the modification of terms and the loan is no longer considered past due. Management continually reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original EIR.

(iv) Collateral valuation

The Bank seeks to use collateral, where possible, to mitigate its risks on financial assets. The collateral comes in various forms such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. The fair value of collateral is generally assessed, at a minimum, at inception and then revalued on periodic basis as deemed necessary, however, some collateral, for example, cash or securities relating to margining requirements, is valued daily.

To the extent possible, the Bank uses active market data for valuing financial assets, held as collateral. Other financial assets which do not have a readily determinable market value are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, housing price indices, audited financial statements, and other independent sources.

2.2.9 Cash and cash equivalents

Cash and cash equivalents include notes and coins in hand, unrestricted balances held with central banks, operating accounts with other banks, amount due from other banks and highly liquid financial assets with original maturities of three months or less from the acquisition date, which are subject to insignificant risk of changes in their fair value, and are used by the Bank in the management of its short-term commitments. Cash and cash equivalents are carried at amortised cost in the statement of financial position.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

2.2.10 Property, plant and equipment

(i) Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses.

Cost includes expenditures that are directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the assets to a working condition for their intended use, the costs of dismantling and removing the items and restoring the site on which they are located and capitalised borrowing costs. Purchased software that is integral to the functionality of the related equipment is capitalised as part of equipment.

When parts of an item of property or equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The gain or loss on disposal of an item of property, plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of the item of property, plant and equipment, and is recognised in other income/other expenses in profit or loss.

(ii) Reclassification to investment property

When the use of property changes from owner-occupied to investment property, the property is re-measured to fair value and reclassified as investment property. Any gain arising on re-measurement is recognised in profit or loss to the extent that it reverses a previous impairment loss on the specific property, with any remaining gain recognised in other comprehensive income and presented in revaluation reserve in equity. Any loss is recognised immediately in profit or loss.

(iii) Subsequent costs

The cost of replacing a component of an item of property or equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Bank and its cost can be measured reliably. The carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of property, plant and equipment are recognised in profit or loss as incurred.

(iv) Depreciation

Depreciation is recognised in profit or loss on a straight-line basis to write down the cost of each asset, to their residual values over the estimated useful lives of each part of an item of property, plant and equipment. Leased assets under finance lease are depreciated over the shorter of the lease term and their useful lives.

Depreciation begins when an asset is available for use and ceases at the earlier of the date that the asset is derecognised or classified as held for sale in accordance with IFRS 5 -Noncurrent Assets Held for Sale and Discontinued Operations. A noncurrent asset or disposal group is not depreciated while it is classified as held for sale.

The estimated useful lives for property, plant and equipment are as follows:

Leasehold land Over the lease period

Leasehold buildings50 yearsComputer equipment3 yearsFurniture, fittings & equipment5 yearsMotor vehicles4 yearsLeasehold improvements10 years

Depreciation methods, useful lives and residual values are reassessed at each reporting date and adjusted if applicable.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies – Continued

(v) De-recognition

An item of property, plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period the asset is derecognised.

2.2.11 Intangible assets

Software

Software acquired by the Bank is stated at cost less accumulated amortisation and accumulated impairment losses. Expenditure on internally developed software is recognised as an asset when the Bank is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits, and can reliably measure the costs to complete the development. The capitalised costs of internally developed software include all costs directly attributable to developing the software, and are amortised over its useful life. Internally developed software is stated at capitalised cost less accumulated amortisation and impairment.

Subsequent expenditure on software assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates. All other expenditure is expensed as incurred. Amortisation is recognised in profit or loss on a straight-line basis over the estimated useful life of the software, from the date that it is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The estimated useful life of software is five years. Amortisation method, useful lives, and residual values are reviewed at each financial yearend and adjusted if appropriate.

2.2.12 Leased assets

The determination of whether an arrangement is a lease, or contains a lease, is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

Leases in terms of which the Bank transfers substantially all the risks and rewards incidental to ownership are classified as finance leases. Upon initial recognition the leased asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments. Subsequent to initial recognition, the asset is accounted for in accordance with the accounting policy applicable to that asset. Other leases are operating leases and, except for investment property, the leased assets are not recognised in the Bank's statement of financial position. Investment property held under an operating lease is recognised in the Bank's statement of financial position at its fair value.

Bank as a lessor

Leases where the Bank does not transfer substantially all of the risks and benefits of ownership of the asset are classified as operating leases. Initial direct costs incurred in negotiating operating leases are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

2.2.13 Impairment of non-financial assets

The carrying amounts of the Bank's non-financial assets other than goodwill and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies – Continued

The recoverable amount of goodwill is estimated at each reporting date. An impairment loss is recognised if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. A cash-generating unit is the smallest identifiable asset group that generates cash flows that largely are independent from other assets and groups. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the units and then to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

An impairment loss in respect of goodwill is not reversed. In respect of other assets, impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.2.14 Provisions

A provision is recognised if, as a result of a past event, the Bank has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for restructuring is recognised when the Bank has approved a detailed and formal restructuring plan, and the restructuring either has commenced or has been announced publicly. Future operating costs are not provided for.

A provision for onerous contracts is recognised when the expected benefits to be derived by the Bank from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract. Before a provision is established, the Bank recognises any impairment loss on the assets associated with that contract.

2.2.15 Financial guarantee contracts

Financial guarantees are contracts that require the Bank to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Financial guarantee liabilities are initially recognised at their fair value, which is the amount received, and then amortised over the life of the financial guarantee. Subsequent to initial recognition, the financial guarantee liability is measured at the higher of the present value of any expected payment, when a payment under the guarantee has become probable, and amount initially recognised less when appropriate, cumulative amortisation recognised in accordance with IAS 18. Crystallised financial guarantees are included within Other liabilities.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies – Continued

2.2.16 Employee Benefits

a) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in profit or loss in the periods during which services are rendered by employees. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available. Contributions to a defined contribution plan that is due more than 12 months after the end of the period in which the employees render the service are discounted to their present value at the reporting date.

The Bank operates a funded defined contribution retirement benefit scheme for its employees under the provisions of the Pension Reform Act 2004. The employer and the employee contributions are 7.5% each of the qualifying employee's salary. Obligations in respect of the Bank's contributions to the scheme are recognised as an expense in the profit or loss account on an annual basis.

(b) Short-term benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are expected to be settled wholly before twelve months after the end of the annual reporting period in which the employees render the related service.

A liability is recognised for the amount expected to be paid under short-term cash bonus or profit sharing plans if the Bank has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the obligation can be estimated reliably.

2.2.17 Borrowing costs

Borrowing costs are interest and other costs incurred in connection with the borrowing of funds. Borrowing costs are recognised as an expense in the period in which they are incurred, except to those that are directly attributable to the acquisition, construction or production of a qualifying asset which are capitalised as part of the cost of that asset.

The amount of borrowing costs eligible for capitalisation is determined by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate is the weighted average of the borrowing costs applicable to the Bank's borrowings that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalised during a period shall not exceed the amount of borrowing costs incurred during that period.

2.2.18 Contingencies

(a) Contingent asset

Contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

A contingent asset is disclosed when an inflow of economic benefit is probable. When the realisation of income is virtually certain, then the related asset is not contingent and its recognition is appropriate. Contingent assets are assessed continually to ensure that developments are appropriately reflected in the financial statements.

(b) Contingent Liability

Contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability.

Contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefit is remote. A provision for the part of the obligation for which an outflow of resources embodying economic benefits is probable is recognised, except in the extremely rare circumstances where no reliable estimate can be made.

Contingent liabilities are assessed continually to determine whether an outflow of economic benefit has become probable.

2.2.19 Share capital

(i) Share issue costs

Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments.

(ii) Share premium

Any excess of the fair value of the consideration received over the par value of shares issued is recognised as share premium.

(iii) Dividend on ordinary shares

Dividends on the Bank's ordinary shares are recognised in equity in the period in which they are approved and declared by the Bank's shareholders.

(iv) Treasury shares

Where the Bank purchases its share capital, the consideration paid is deducted from the shareholders' equity as treasury shares until they are cancelled. Where such shares are subsequently sold or reissued, any consideration received is included in shareholders' equity.

2.2.20 Equity reserves

(i) Revaluation reserve

The revaluation reserve is used to record increases in the fair value of investment properties and decreases to the extent that such decrease relates to an increase on the same asset previously recognised in equity. The existing balance in this reserve has been moved to other regulatory reserves as a result of the Bank's reclassification of its investment property to its property, plant and equipment.

(ii) Translation reserve

This is used to record exchange differences arising from the translation of the net investment in foreign operations, net of the effects of hedging.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

(i) Fair value reserve

The fair value reserve includes the net cumulative change in the fair value of available-for-sale investments until the investment is derecognized or impaired.

(ii) Share capital reserve

The share capital reserve represents the surplus nominal value of the shares of the Bank which were reconstructed in June 2006.

(iii) Regulatory risk reserve

The regulatory risk reserve warehouses the difference between the impairment on loans and advances computed based on the Central Bank of Nigeria Prudential Guidelines compared with the incurred loss model used in calculating the impairment under IFRS.

(iv) SMEEIS reserve

The SMEEIS reserve is maintained to comply with the Central Bank of Nigeria (CBN) requirement that all licensed banks set aside a portion of the profit after tax in a fund to be used to finance equity investment in qualifying small and medium scale enterprises.

(v) Other regulatory reserves

This represents regulatory appropriation to statutory reserves of 30% of profit after tax if the statutory reserve is less than paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

2.2.21 Earnings per share

The Bank presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Bank by the weighted average number of ordinary shares outstanding during the period.

Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

2.2.22 Segment reporting

An operating segment is a component of the Bank that engages in business activities from which it can earn revenues and incur expenses, including revenues and expenses that relate to transactions with any of the Bank's other components, whose operating results are reviewed regularly by the Bank's Management Committee (being the chief operating decision maker) to make decisions about resources allocated to each segment and assess its performance, and for which discrete financial information is available. The Bank segment reporting is based on the following operating segments: Corporate banking, Retail banking and Treasury.

2.2.23 Foreign Currency Translation

The Bank's functional and presentation currency is Nigerian Naira ("N"). Transactions in foreign currencies are initially recorded at the spot rate of exchange ruling at the date of the transaction.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.2 Summary of significant accounting policies - Continued

Monetary assets and liabilities denominated in foreign currencies are translated at the spot rate of exchange at the reporting date. All differences arising on non-trading activities are taken over to Other Operating Income in the income statement, with the exception of differences in foreign currency borrowings that provide an effective hedge against a net investment in a foreign entity, if any. These differences are taken directly to equity until the disposal of the net investment, at which time, they are recognised in the income statement.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the spot exchange rates as at the date of recognition. Non-monetary items measured at fair value in a foreign currency are translated using the spot exchange rates at the date when the fair value was determined.

Securities lent to counterparties are also retained in the financial statements. Securities borrowed are not recognised in the financial statements, unless these are sold to third parties, in which case the purchase and sale are recorded with the gain or loss included in trading income.

2.2.24 Pledged financial assets

Financial assets pledged as collateral are classified separately from other assets when the counterparty has the right to sell or re-pledge the collateral (by custom or contract) and so financial assets held for trading and as available-for-sale are shown separately in the statement of financial position if they can be sold or pledged by the transferee.

2.3 New Standards and Improvements

New standards, interpretations and amendments adopted by the Bank

The accounting policies adopted in the preparation of the 2013 financial statements are consistent with those followed in the preparation of the Bank's 2012 financial statements, except for the adoption of new standards or interpretations effective as of 1 January 2013.

The nature and the impact of each new standard/amendment are described below:

2.3.1 IAS 1 - Presentation of Items of Other Comprehensive Income - Amendments to IAS 1

The amendments to IAS 1 introduce a grouping of items presented in other comprehensive income (OCI). Items that could be reclassified (or recycled) to profit or loss at a future point in time (e.g., net gain on hedge of net investment, exchange differences on translation of foreign operations, net movement on cash flow hedges and net loss or gain on available-forsale financial assets) now have to be presented separately from items that will never be reclassified (e.g., actuarial gains and losses on defined benefit plans and revaluation of land and buildings). The amendment affected presentation only and had no impact on the Bank's financial position or performance.

2.3.2. IAS 1- Clarification of the requirement for comparative information (Amendment)

The amendment to IAS 1 clarifies the difference between voluntary additional comparative information and the minimum required comparative information. An entity must include comparative information in the related notes to the financial statements when it voluntarily provides comparative information beyond the minimum required comparative period. The additional voluntarily comparative information does not need to be presented in a complete set of financial statements.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 New Standards and improvements – Continued

2.3.2. IAS 1- Clarification of the requirement for comparative information (Amendment) -continued

An opening statement of financial position (known as the 'third balance sheet') must be presented when an entity applies an accounting policy retrospectively, makes retrospective restatements, or reclassifies items in its financial statements, provided any of those changes has a material effect on the statement of financial position at the beginning of the preceding period. The amendment clarifies that a third balance sheet does not have to be accompanied by comparative information in the related notes. Under IAS 34, the minimum items required for interim financial statements do not include a third balance sheet. The amendment had no impact on the Bank's financial position or performance as there was no retrospective application of accounting policy, nor retrospective restatement or reclassification.

2.3.3 IAS 32 - Tax effects of distributions to holders of equity instruments (Amendment)

The amendment to IAS 32 Financial Instruments: Presentation clarifies that income taxes arising from distributions to equity holders are accounted for in accordance with IAS 12 Income Taxes. The amendment removes existing income tax requirements from IAS 32 and requires entities to apply the requirements in IAS 12 to any income tax arising from distributions to equity holders. The amendment did not have an impact on the financial statements of the Bank, as there is no tax consequences attached to cash or non-cash distribution.

2.3.4 IAS 34 - Interim financial reporting and segment information for total assets and liabilities (Amendment)

The amendment clarifies the requirements in IAS 34 relating to segment information for total assets and liabilities for each reportable segment to enhance consistency with the requirements in IFRS 8 Operating Segments. Total assets and liabilities for a reportable segment need to be disclosed only when the amounts are regularly provided to the chief operating decision maker and there has been a material change in the total amount disclosed in the entity's previous annual financial statements for that reportable segment. The Bank provides this disclosure as total segment assets were reported to the chief operating decision maker (CODM). As a result of this amendment, the Bank now also includes disclosure of total segment liabilities as these are reported to the CODM.

2.3.5 IAS 16 Property, Plant and Equipment (Amendments) – Classification of servicing equipment

The amendment clarifies that major spare parts and servicing equipment that meet the definition of property, plant and equipment are not inventory.

2.3.6 IAS 19 - Employee Benefits (Revised 2011) (IAS 19R)

IAS 19R includes a number of amendments to the accounting for defined benefit plans, including actuarial gains and losses that are now recognised in other comprehensive income (OCI) and permanently excluded from profit and loss; expected returns on plan assets that are no longer recognised in profit or loss, instead, there is a requirement to recognise interest on the net defined benefit liability (asset) in profit or loss, calculated using the discount rate used to measure the defined benefit obligation, and; unvested past service costs are now recognised in profit or loss at the earlier of when the amendment occurs or when the related restructuring or termination costs are recognised. Other amendments include new disclosures, such as, quantitative sensitivity disclosures.

In case, the transition to IAS 19R had an impact on the net defined benefit plan obligations due to the difference in accounting for interest on plan assets and unvested past service costs. This has no impact on the Bank.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 New Standards and improvements - Continued

2.3.7 IFRS 7 - Financial Instruments: Disclosures - Offsetting Financial Assets and Financial Liabilities (Amendments to IFRS 7)

The amendment requires an entity to disclose information about rights to set-off financial instruments and related arrangements (e.g., collateral agreements). The disclosures would provide users with information that is useful in evaluating the effect of netting arrangements on an entity's financial position. The new disclosures are required for all recognised financial instruments that are set off in accordance with IAS 32. The disclosures also apply to recognised financial instruments that are subject to an enforceable master netting arrangement or similar agreement, irrespective of whether the financial instruments are set off in accordance with IAS 32. As the Bank is not setting off financial instruments in accordance with IAS 32 and does not have relevant offsetting arrangements, the amendment does not have an impact on the Bank.

2.3.8 IFRS 10 - Consolidated Financial Statements and IAS 27 Separate Financial Statements

IFRS 10 establishes a single control model that applies to all entities including special purpose entities. IFRS 10 replaces the parts of previously existing IAS 27 Consolidated and Separate Financial Statements that dealt with consolidated financial statements and SIC-12 Consolidation – Special Purpose Entities. IFRS 10 changes the definition of control such that an investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. To meet the definition of control in IFRS 10, all three criteria must be met, including:

- (a) an investor has power over an investee;
- (b) the investor has exposure, or rights, to variable returns from its involvement with the investee; and
- (c) the investor has the ability to use its power over the investee to affect the amount of the investor's returns.

IFRS 10 had no impact on the Bank's financial statements.

2.3.9 IFRS 11- Joint Arrangements and IAS 28 - Investments in Associates and Joint Ventures

IFRS 11 replaces IAS 31 Interests in Joint Ventures and SIC-13 Jointly-controlled Entities — Non-monetary Contributions by Venturers. IFRS 11 removes the option to account for jointly controlled entities (JCEs) using proportionate consolidation. Instead, JCEs that meet the definition of a joint venture under IFRS 11 must be accounted for using the equity method. This has no effect on the financial statements.

2.3.10 IFRS 12 - Disclosure of Interests in Other Entities

IFRS 12 sets out the requirements for disclosures relating to an entity's interests in subsidiaries, joint arrangements, associates and structured entities. None of these disclosure requirements are applicable to the Bank.

2.3.11 IFRS 13 - Fair Value Measurement

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS when fair value is required or permitted. The application of IFRS 13 has not materially impacted the fair value measurements carried out by the Bank.

IFRS 13 also requires specific disclosures on fair values, some of which replace existing disclosure requirements in other standards, including IFRS 7 Financial Instruments: Disclosures. Some of these disclosures are specifically required for financial instruments by IAS 34.16A(j), thereby affecting the interim financial statements period. The Bank provides these disclosures in Note 38.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

2.3 New Standards and improvements - Continued

2.3.12 IFRIC Interpretation 20 Stripping Costs in the Production Phase of a Surface Mine

This Interpretation applies to waste removal costs that are incurred in surface mining activity during the production phase of the mine ('production stripping costs'). This Interpretation addresses the following issues-recognition of production stripping costs as an asset; initial measurement of the stripping activity asset; and subsequent measurement of the stripping activity asset. This standard is applicable for annual periods beginning on or after 1 January 2013. This is not applicable to the Bank.

In addition to the above-mentioned amendments and new standards, IFRS 1 First-time Adoption of International Financial Reporting Standards was amended with effect for reporting periods starting on or after 1 January 2013. The Bank is not a first-time adopter of IFRS, therefore, this amendment is not relevant to the Bank.

The Bank has not adopted any other standard, interpretation or amendment that has been issued but is not yet effective.

3. Significant accounting judgements, estimates and assumptions

The preparation of the Bank's financial statements requires management to make judgements, estimates and assumptions that affect the reported amount of revenues, expenses, assets and liabilities and the accompanying disclosure, as well as the disclosure of contingent liability about these assumption and estimates could result in outcome that require a material adjustment to the carrying amount of assets and liabilities affected in future periods.

Management discusses with the Audit Committee the development, selection and disclosure of the Bank's critical accounting policies and estimates, and the application of these policies and estimates.

Estimates and Assumptions

The key assumption concerning the future and other key sources of estimation uncertainly at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period, are described below. The Bank based its assumption and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumption about future developments, however, may change due to market changes or circumstances beyond the control of the Bank. Such changes are reflected in the assumptions when they occur.

(i) Going Concern

The Bank's management has made an assessment of its ability to continue as a going concern and is satisfied that it has the resources to continue in the business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the financial statements continue to be prepared on the going concern basis.

NOTES TO THE FINANCIAL STATEMENTS - Continued

3. Significant accounting judgements, estimates and assumptions-continued

(ii) Allowances for credit losses

Assets accounted for at amortised cost are evaluated for impairment on a basis described in accounting policy Note 2.2.8.

The specific counterparty component of the total allowances for impairment applies to claims evaluated individually for impairment and is based upon management's best estimate of the present value of the cash flows that are expected to be received. In estimating these cash flows, management makes judgements about a counter party's financial situation and the net realisable value of any underlying collateral. Each impaired asset is assessed on its merits, and the workout strategy and estimate of cash flows considered recoverable are independently approved by the Credit Committee.

Collectively assessed impairment allowances cover credit losses inherent in portfolios of loans with similar economic characteristics when there is objective evidence to suggest that they contain impaired loans, but the individual impaired items cannot yet be identified. In assessing the need for collective loan loss allowances, management considers factors such as credit quality, portfolio size, concentrations, and economic factors. In order to estimate the required allowance, assumptions are made to define the way inherent losses are modelled and to determine the required input parameters, based on historical experience and current economic conditions. The accuracy of the allowances depends on how well these estimate of future cash flows for specific counterparty allowances and the model assumptions and parameters used in determining collective allowances are made.

(iii) Fair value of financial instruments

The determination of fair value for financial assets and liabilities for which there is no observable market price requires the use of techniques as described in accounting policy Note 2.2.7. For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

(iv) Deferred tax assets

Deferred tax assets are recognised in respect of tax losses to the extent that it is probable that the future taxable profit will be available against which the losses can be utilised. Judgement is required to determine the amount of deferred tax that can be recognised, based upon the likely timing and level of future taxable profits, together with future tax-planning strategies. Tax losses can be used indefinitely.

Judgments

In the process of applying the Bank's accounting policies, management has made the following judgements, which have significant effect on the amount recognised in the financial statements:

(i) Depreciation and carrying value of property, plant and equipment

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated useful lives of items of property and equipment will have an impact on the carrying value of these items.

NOTES TO THE FINANCIAL STATEMENTS - Continued

2. Significant accounting judgements, estimates and assumptions-continued

(ii) Determination of impairment of property, plant and equipment, and intangible assets

Management is required to make judgements concerning the cause, timing and amount of impairment. In the identification of impairment indicators, management considers the impact of changes in current competitive conditions, cost of capital, availability of funding, technological obsolescence, discontinuance of services and other circumstances that could indicate that impairment exists. The Bank applies the impairment assessment to its separate cash generating units. This requires management to make significant judgements and estimates concerning the existence of impairment indicators, separate cash generating units, remaining useful lives of assets, projected cash flows and net realisable values. Management's judgement is also required when assessing whether a previously recognised impairment loss should be reversed

(iii) Determination of collateral Value

Management monitors market value of collateral in a regular basis. Management uses its experienced judgement on independent opinion to adjust the fair value to reflect the current circumstances. The amount and collateral required depend on the assessment of credit risk of the counterpart.

4. Standards issued but not yet effective

Standards and improvement that are issued but not yet effective up to the date of review of the Banks financial statements are disclosed below. The Bank intends to adopt the standards and improvements, if applicable, below when it becomes effective:

(i) IFRS 9 - Financial Instrument: Classification and Measurement

IFRS 9 as issued reflects the first phase of the IASB's work on the replacement of IAS 39 and applies to the classification and measurement of financial assets and liabilities as defined in IAS 39. The standard should have been effective for annual periods beginning on or after 1 January 2015, but the IASB at its July 2013 meeting tentatively decided to defer the mandatory effective date of IFRS 9 until the issue date of the completed version of IFRS 9 is known. The impact of this IFRS will be in the area of classification and measurement of financial assets, reporting for entities that have designated liabilities using FVO. The other phases including impairment and hedge accounting are also expected to have significant accounting implications.

Improvement to IFRSs

Amendments resulting from improvements to IFRSs to the following standards did not have a material impact on the accounting policies, financial position or performance of Sterling Bank Plc during the year.

- IFRS 10, IFRS 12 and IAS 27 Investment Entities
- IAS 27 Separate Financial Statements
- IAS 32 Offsetting Financial Assets and Financial Liabilities
- IAS 36 Recoverable Amount Disclosures for Non-Financial Assets
- IAS 39 Novation of Derivatives and Continuation of Hedge Accounting
- IFRIC 21 Levies

NOTES TO THE FINANCIAL STATEMENTS - Continued

5. Segment Information

Segment information is presented in respect of the Bank's strategic business units which represents the segment reporting format and is based on the Bank's management and reporting structure.

- (a) All non-current assets are located in the country of domicile and revenues earned are within same country.
- (b) Reportable segment

The Bank has three reportable segments; Retail Banking, Corporate Banking and Treasury which are the Bank's strategic business units. The strategic business units offer different products and services, and are managed separately based on the Bank's management and internal reporting structure. For each of the strategic business units, the Executive Management Committee reviews internal management reports on a monthly basis.

The following summary describes the operations in each of the Bank's reportable segments:

- Corporate Banking provides banking solutions to corporate and commercial enterprises.
- o Retail Banking provides banking solutions to individuals, small businesses and partnerships among others.
- Treasury conducts the Bank's financial advisory and securities trading activities.

All transactions between business segments are conducted on an arm's length basis, internal charges and transfer pricing adjustments are reflected in the performance of each business.

The activity of the segments are centrally financed, thus the cash flow for the entity is presented in the Statement of Cash Flows.

AMCON sinking fund contribution

This represents the Bank's contribution to a fund established by the Asset Management Corporation of Nigeria (AMCON) for the year ended 31 December 2013. Effective 1 January 2013, the Bank is required to contribute an equivalent of 0.5% (2012: 0.3%) of its total assets and 33.3% of off-balance sheet assets as at the preceding year end to AMCON's sinking fund in line with existing guidelines.

	Estimated charge for the year (see (14a) above)	942,232	471,116
	Payments during the year	(633,365)	(345,620)
	Balance, end of the year	1,112,289	803,422
		======	======

c. Reconciliation of total tax charge

The basis of income tax is 30% of 43,140,772,886.20 dividend paid to shareholders in 2013 relating to the 2012 financial year results. This is in compliance with Section 15A of Company Income Tax Act which states that where there is no taxable profit or total profit is less than the amount of dividend paid, the company shall be charged as if the dividend is the total profits of the company for the year of assessment to which the accounts, out of which dividend is declared relates.

- d. The National Information Technology Agency Act (NITDA) 2007, stipulates that specified companies contribute 1% of their profit before tax to National Information Development Agency. In line with the Act, the Bank has provided for Information technology levy at the specified rate.
- e. The Provisions of the Companies Income Tax (Exemption of Bonds and Short Term Government Securities) Order, 2011 grants exemption to income from bonds and treasury bills from tax for a period of 10 years.

- (d) Central Bank of Nigeria stipulates that provisions for loans recognized in the profit or loss account be determined based on the requirements of IFRS. The IFRS provision should be compared with provisions determined under prudential guidelines and the expected impact/changes in Retained Earnings should be treated as follows:
 - (i) Prudential impairment allowance is greater than IFRS impairment allowance; transfer the difference from the Retained Earnings to a non-distributable Regulatory risk reserve.
 - (ii) Prudential impairment allowance is less than IFRS impairment allowance; the excess charges resulting should be transferred from the Regulatory risk reserve account to the Retained Earnings to the extent of the non-distributable reserve previously recognized.

Fair value of unquoted equity securities has not been disclosed, their fair value cannot be measured reliably. These are investments in small and medium scale enterprises with a carrying cost of N1.89 billion (2012: N1.96 billion). There is

no similar investment that the price can be reliably benchmarked because there is no active market. These investments are recouped through redemption rather than disposal.

The carrying value of other borrowed funds approximates fair value.

i Due to Citibank

This represents the Naira equivalent of a USD95,000,000 facility granted to the Bank for general corporate purposes by Citibank International PIc payable in 4 years commencing October 2008 and interest is payable quarterly at a LIBOR plus a margin of 475 basis point. The facility was renegotiated to mature in 26 September 2017 at a fixed rate of 7.50 % annually for each Interest Period up to and including the Interest Payment Date falling in September 2013 and 6.20 per cent per annum for each Interest Period falling thereafter. The loan is secured with pledged assets as indicated in Note 18.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

26 Other borrowed funds - continued

ii Due to Bank of Industry (BOI)

This is a facility from Bank of Industry under the Central Bank of Nigeria N200billion intervention fund for refinancing and restructuring of Banks' existing loan portfolios to Nigeria SME/Manufacturing sector. The facility is administered at an all-in interest rate/charge of 7% per annum payable on quarterly basis. Specifically, the managing agent (BOI) shall be entitled to a 1% management fee and the Bank a 6% spread. Loans shall have a maximum tenor of 15 years and/or working capital facility of 1 year with provision for roll over.

Also included in the figure above is a facility from Bank of Industry under Central Bank of Nigeria N500 billion intervention fund for Aviation and Power sector.

iii Due to CBN Agricultural Fund

This represents a facility granted by the Central Bank of Nigeria (CBN) in Ref DFD/PMO/GEN/001/273. This was granted in collaboration with the Federal Government of Nigeria (FGN) represented by the Federal Ministry of Agriculture and Water Resources (FMA &WR) by establishing a Commercial Agricultural Scheme (CACS) to promote commercial agricultural enterprise in Nigeria. All facilities approved by the participating banks under the scheme is for a maximum period of 7 years while overdraft facilities approved are for a period of 1 year. The loans are at all-in-interest rate of 9% per annum.

Also included therein are facilities granted by the Bank, under The Nigeria Incentive-Based Risk Sharing System for Agricultural Lending (NIRSAL) scheme. This is an initiative of the Central Bank of Nigeria (CBN), the Bankers Committee (BC) and the Federal Ministry of Agriculture & Rural Development (FMA&RD). Facilities are approved by the participating Banks at commercial rate, and the Customer enjoys an interest rebate of 35% to 50% on the rate depending on the category of the project. NIRSAL also sells Credit Risk Guarantee, at a cost of 3% of the facility amount, to give coverage of 40%-75% of the facility amount depending on the category of the project

Iv Due to NEXIM

This represents a stocking facility of N400million granted by the Nigerian Export-Import Bank in favour of Armada International Limited. The facility has a tenor of 365 days with quarterly interest repayment and bullet repayment of principal on maturity. Sterling Bank Plc is the Primary obligor of the facility and shall upon maturity repay to NEXIM Bank through RTGS system, the Face Value of the facility with accrued interest. Upon failure to meet repayment on due date, NEXIM Bank reserves the right to review the applicable interest rate upwards until the Facility is fully liquidated. The loan has an interest rate of 13% per annum.

v Due to Standard Chartered Bank

Standard Chartered Bank London makes available to the bank a short-term finance facility in a maximum principal amount of up to \$30,000,000. The purpose of the facility is towards financing of the Dollar trade and general funding of the Sub borrowers. The tenor of the facility is twelve months, the rate of interest on the Loan for the relevant Interest Period is the percentage rate per annum determined by the lender to be the aggregate of the applicable Margin (3.35%) and LIBOR. Interest payable on the loan shall be calculated by reference to successive Interest Periods each of three (3) Months duration.

a. Other regulatory reserves

The other regulatory reserves include movements in the statutory reserves. Nigerian banking regulations require the Bank to make an annual appropriation to a statutory reserve. As stipulated by S.16(1) of the Banks and Other Financial Institutions Act and Cap 33 Laws of the Federation of Nigeria, an appropriation of 30% of profit after tax is made if the

statutory reserve is less than the paid-up share capital and 15% of profit after tax if the statutory reserve is greater than the paid up share capital.

b. The SMEEIS reserve is maintained to comply with the Central Bank of Nigeria (CBN) requirement that all licensed banks set aside a portion of the profit after tax in a fund to be used to finance equity investment in qualifying small and medium scale enterprises. Under the terms of the guideline (amended by CBN letter dated 11 July 2006), the contributions will be 10% of profit after tax and shall continue after the first 5 years but banks' contributions shall thereafter reduce to 5% of profit after tax. However, this is no longer mandatory. In prior year, 10% of profit after taxation was transferred to SMEEIS reserves in accordance with Small and Medium Enterprise Equity Investment Scheme as revised in April 2005. The Bank has suspended further appropriation to SMEEIS (now known as Microcredit Fund) reserve account in line with the decision reached at the Banker's Committee meeting and approved by CBN.

32 Contingencies

a Litigations and claims

There are litigations and claims against the Bank as at 31 December 2013 which arose in the normal course of business and are being contested by the Bank. The Directors, having sought advice of professional counsel, are of the opinion that no significant liability will crystallise from these claims. Provisions of #263million (2012: #263million) have been made in these financial statements on crystallised claims.

b Contingent liabilities and commitments

In the normal course of business, the Bank conducts business involving acceptances, performance bonds and indemnities. The majority of these facilities are offset by corresponding obligations of third parties. Contingent liabilities and commitments comprise performance bonds, acceptances, guarantees and letters of credit.

Nature of instruments:

To meet the financial needs of customers, the Bank enters into various commitments and contingent liabilities. These consist of financial guarantees and letters of credits. These obligations are not recognised on the statement of financial position because the risk has not crystallised.

Letters of credit and guarantees commit the Bank to make payments on behalf of customers in the event of a specific act, generally related to the import or export of goods. Guarantees and standby letters of credit carry a similar credit risk to loans.

The following tables summarise the nominal principal amount of contingent liabilities and commitments with off- financial position risk:

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management

(a) Introduction and overview

Risks are inherent in the lending, trading and all other intermediation activities of the Bank. In managing these risks, the Bank has adopted an Enterprise Risk Management Philosophy of building a sound, safe and stable financial institution through the efficient management of risks. In achieving this, the Bank has adopted a standard template and common methodology for risk identification, measurement, management and control.

The Bank is exposed to Credit Risk, Liquidity Risk, and Market Risk; both in the trading book and banking book and Operational Risk among other risks. The Bank has put in place approved policies, procedures and guidelines for identifying, measuring, management and control of these risks.

(b) Risk Management Structure

The responsibility for management of the total risk exposure of the Bank rests with the Board, this responsibility is delegated to various committees of the Board.

The Board Risk Management Committee (BRMC) is saddled with the responsibility of managing the overall risk exposure of the Bank. The committee reviews and recommends risk management policies and procedures for Board approval.

The Board Credit Committee (BCC) acts on behalf of the Board of Directors on all credit matters. It considers and approves lending exposures, treasury investments exposures, as well as other credit exposures that exceed the mandated approval limit of Management.

The Management Risk Committee (MRC) is responsible for the planning, management and control of the Bank's overall risks; including the determination of the Bank's risk philosophy, appetite, limits and policies.

The Management Credit Committee (MCC) is saddled with the responsibility of credit policy articulation and credit approval that falls within the mandated approval limit. It reviews and recommends credit policy direction to the BCC.

The Assets and Liability/Market Risk Committee ensures that the Bank has adequate liquidity to meet the funding need of the Bank, and also manages the interest rate and foreign exchange risk of the Bank. The Committee also reviews the economic outlook and its likely impact on the Bank`s current and future performance.

The Criticised Assets Committee (CAC) reviews the non-performing loans stock and recommends strategies for recovery of bad loans. The committee also reviews the Bank`s loan portfolio and ensure the adequacy of collateral documentation. The Enterprise Risk Management Group is saddled with the responsibility of implementing and supervising all risk management policies, guidelines, and procedures.

The Internal Control Department monitors compliance with risk principles, polices and limits across the Bank. Exceptions are reported on a daily basis, where necessary to management and appropriate action are taken to address the identified weaknesses.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

The Internal Audit department as part of its annual audit programme, examines the adequacy and level of compliance with the procedures. Result of assessments, findings and recommendations are discussed with the relevant department, and reports to the Board Audit Committee.

(c) Risk measurement and reporting systems

In measuring the risk exposure of the Bank, particular emphasis is placed on the methodologies that estimate both expected and unexpected loss. Central to this; is the quantitative and qualitative assessment of credit risks through a rigorous internal ratings system. The Bank also runs sensitivity analysis and stress testing to identify potential exposure under stress market situations.

Monitoring and controlling of risk is done by ensuring that limits established are strictly complied with and that such limit reflects both the quantitative and qualitative risk appetite of the Bank. Particular emphasis is placed on the Risk Acceptance Criteria (RAC) set in identifying customers in the target industries. Furthermore, the Bank's policy is to measure and monitor the overall risk bearing capacity in relation to the aggregate risk exposure across all risk types and activities.

Risk Information compiled from all business activities of the Bank is analysed and processed towards identifying and controlling risks on a timely basis. Risk reports are presented on a timely basis for informed management decision. The Management Risk Committee (MRC) and the Board Risk Management Committee (BRMC) which constitute the supervisory body are updated of the risk profile of the Bank by of way quarterly risk reports.

(d) Risk mitigation

The Bank has in place a set of management actions to prevent or mitigate the impact on earnings of business risks. Business risk monitoring, through regular reports and oversight, results in corrective actions to plans and ensure reductions in exposures where necessary. Credit control and mitigation polices are also in place. Collateral policies are designed to ensure that the Bank's exposure is secured, and to minimize the risk of credit losses to the Bank in the event of decline in quality or delinquency of assets.

Guidelines for accepting credit collateral are documented and articulated in the Credit Policy Guidelines (CPG). These include;

- a. Acceptable collateral for each credit product.
- b. Required documentation/perfection of collaterals

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

- c. Conditions for waiver of collateral requirement and approval of collateral waiver.
- d. Acceptance of cash and other forms of collateral denominated in foreign currency.

Finally, master netting arrangements for credit facilities collateralised partly with deposits are settled by set-off based on underlying set-off agreement.

(e) Excessive risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Bank's performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risk, credit concentration limits are set and monitored along industries and sectors, geography, collaterals and products. The ultimate objective of managing credit portfolio concentration risk is to ensure proper diversification of the risk assets portfolio. Concentration limits are also in place to manage Investment Portfolio and customer deposit concentration in the management of liquidity risk.

(f) Risk management architecture

To achieve its risk management objectives, the Bank has a risk management framework that comprises the following elements:

- A risk management culture.
- A governance culture.
- Risk management policies.
- A review of risk decisions by independent professionals.
- Independent oversight by the Compliance Department.
- An independent assessment by the Internal Audit Department.

(g) Credit Risk Management

The Bank's credit risk management activities are based on certain fundamental principles.

The effectiveness of risk management process throughout the Bank is based on a simple formal governance structure with regular reporting processes within a well-defined control environment.

The Bank's risk policy allows its personnel take initiatives and responsibility to proactively identify risks in delivering products and services to the market in a value-added manner.

The Bank's risk assets are managed to help provide the liquidity to meet deposit withdrawals, cover all expenses, and still earn sufficient profit to make returns which are competitive with other investments.

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

Credit risks are examined for all credit-related transactions including investments and trading transactions, in addition to loans and leases. Credit risks are examined and managed for unfunded loan commitments in addition to funded loans and leases.

Credit risks are managed such that loan quality and the Bank's reputation are aligned with the Bank's objective of conservative risk appetite, balanced against a desire for reasonable returns.

(h) Methodology for risk rating

The Bank has an internal credit rating system for the risk assessment and rating of credit exposures.

The Bank's credits are classified into corporate and retail.

Retail loans:

They are governed by standard credit product programmes and a credit scoring model is used to rate customers.

Corporate Loans:

Corporate customers are classified into Structured and Unstructured.

Separate risk rating grids are maintained for structured and unstructured customers

Credit Scoring System:

The Bank's credit scoring system assigns value to various factors. These values are weighted based on their correlation to default predictions and the Bank's business objectives. They are added and averaged to determine a credit score for application. The scoring system either recommends for approval or decline, or refers the application for further analysis.

The risk rating methodology is based on Quantitative and Qualitative factors.

- Structured Businesses:
- 1. Quantitative factors are basically the financial ratios which include:
 - a. Leverage ratios
 - b. Liquidity ratios
 - c. Profitability ratios
 - d. Interest Coverage ratios
- 2. Qualitative factors considered are

a. Business Industry

- I. Size of the business
- II. Industry growth
- III. Market Competition
- IV. Entry/Exit barriers

b. Management:

- I. Experience of the management team
- II. Succession Planning
- III. Organizational structure

c. Security:

- I. Collateral type
- II. Collateral coverage
- III. Guarantee i.e. the worth of Personal Guarantee/Corporate Guarantee pledged as support.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

d. Relationship with the Bank:

- I. Account turnover (efficiency ratio)
- II. Account conduct
- III. Compliance with covenants/conditions
- IV. Personal deposits with the bank.

Unstructured Businesses:

These are customers that rarely keep proper accounting records hence the maximum limit that can be availed to them has been restricted to N20m.

The factors to be considered are:

1. Quantitative factors:

Relationship:

i) Contract related transactions

- a) Net Profit Margin
- b) Counterparty Nature/Financial capacity of the Principals

ii) Other Facilities

- a) Account turnover
- b) Repayment history

2. Qualitative factors:

Management:

i. Experience/Technical competence with evidence

ii. Succession Planning

Business Industry

- i. Industry growth
- ii Share of the market

iii Regulations: Whether the industry is regulated or not

iv Entry/Exit

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

(v) Collateral/Security

Collateral often referred to as credit risk mitigant, is an important means of adding assurance of recovery of the Bank's loan. The pledged collateral is documented and continuously reviewed as to its value and marketability. Collaterals are reviewed and scored based on the following parameters:

- Whether secured or not secured
- If secured, what type of security
- Perfectible legal mortgage
- Equitable mortgage
- Chattel mortgages
- Location of security/collateral
- Loan to value ratio of collateral offered
- Marketability of security/collateral
- Whether collateral is a specialised asset or general purpose-type asset.
- Depreciating or appreciating value over time.

(vi) Character

Fundamental to every credit decision is the honesty and integrity of the individuals to whom the Bank lends directly or who manage the enterprises to which the Bank lends. Character is the single most important factor in the credit decision.

(vii) Capacity

The acceptance of a credit depends upon an objective evaluation of the customer's ability to repay the borrowed funds. To establish this, profitability and liquidity ratios are used as part of the assessment.

(viii) Capital

The borrower must provide capital for anticipated adversity. The index to determine capital should be leverage for overdraft, lease and term loan facilities. Customers who cannot provide financials are regarded as having zero leverage.

(ix) Cash Collaterised Facilities

Cash collaterised facilities are not to be subjected to this scoring method, unless the character of the customer is questionable, in which case, the application is rejected.

For cash collaterised facilities, the key issue is safety margin. Local cash deposits shall provide 110% coverage for the Bank's exposure. Foreign currency deposits pledged shall provide minimum 120% coverage for the Bank's exposure.

(x) Pricing

The pricing of facilities is done to reflect the inherent risks for accepting the exposure by the Bank.

The average score computed often determine the minimum level of interest chargeable. This interest rate determined would be a guide. For the purposes of clarity, a prime rate is determined by Asset and Liability management Department and other rates are either above or below it.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

Enterprise risk review

The Bank's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk score to the financial business and the operational risks are an inevitable consequence of being in business.

The Bank's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Bank's financial performance. The Bank's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Bank regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management is carried out by Enterprise Risk Management Group (ERM) within the policies approved by the Board of Directors. The ERM group identifies, evaluates and manages respective aspects of financial risks in close co-operation with

the Bank's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, market risk and operational risk. In addition, the Inspectorate Division is responsible for the independent review of risk management and the control environment. The most important types of risk are Credit risk, Liquidity risk, Market risk and Operational risk. Market risk includes currency risk, interest rate and other price risk.

(i) Credit risk

The Bank manages risk inherent in loans and advances, which is the risk that a counter party will cause a financial loss to the Bank by failing to discharge an obligation. Credit risk is the most important risk inherent in the Bank's business; management therefore carefully manages its exposure to credit risk. Credit exposures arise principally in lending activities that lead to loans and advances, and investment activities that bring debt securities and other instruments into the Bank's asset portfolio.

There is also credit risk in off-balance sheet financial instruments. The credit risk is managed by two departments - Credit Risk Assessment and Credit Administration Departments. They report to the MD/Chief Executive Officer who in turn reports to the Board of Directors.

(ii) Credit risk measurement

Before a sound and prudent credit decision can be taken, the credit risk represented by the borrower or counterparty must be accurately assessed. This assessment is performed at the outset of the credit application process. Each application is analysed and assigned one of 9 (nine) grades using a credit rating system developed by the Bank for all exposures to credit risk. As each grade corresponds to a borrower's or counterparty's probability of default, the credit risk can be determined for the Bank.

(iii) Credit granting process

Credit granting decisions are based first and foremost on the results of the risk assessment. In addition, to the client's solvency, credit granting decisions are also influenced by factors such as available collateral, transaction compliance with policies and standards, procedures and the Bank's overall risk-adjusted returns objective. Each credit granting decision is made by authorities within the risk management teams and management who are independent of the business units and are at a reporting level commensurate with the size of the proposed credit transaction and the associated risk.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

a) Loans and advances

In measuring credit risk of loans and advances to customers and to banks at a counterparty level, the Bank reflects the following components:

- the character and capacity of the client or counterparty to pay down on its contractual obligations;
- (ii) current exposures to the counterparty and its likely future development:
- (iii) credit history of the counterparty and,
- (iv) the likely recovery ratio in case of default obligations -using value of collateral and other ways out.

The Bank's rating scale, which is shown below, reflects the range of default probabilities defined for each rating class. This means that, in principle, exposures migrate between classes as the assessment of their probability of default changes.

The risk rating scale and the external rating equivalent is detailed below:

Risk Rating	External Rating Equivalent	Score Range	Remarks
RR -1	AAA TO AA-	90-100	Superior
RR -2	A+ TO A-	80-89.99	Strong
RR -3	BBB+ TO BB-	70-79.99	Good
RR -4	BB+ TO BB-	50-69.99	Satisfactory
RR -5	B+ TO B-	40-49.99	High risk

RR -6	CCC+ TO CCC	30-39.99	Watch list
RR -7	CC+ TO C	20-29.99	Substandard
RR -8	D	10-19.99	Doubtful
RR -9	D	<10	Lost

(b) Debt securities and other bills

For debt securities and other bills, external rating such as Agusto rating or their equivalents are used by Treasury department primarily to manage their liquidity risk exposures.

(iv) Credit Risk Control & Mitigation policy

The Bank manages, limits and controls concentrations of credit risk wherever they are identified, in particular, to individual counterparties and groups, and to sectors and countries.

The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to a single borrower, or groups of borrowers (single obligor limits), and to geographical and sectoral segments. Such risks are monitored on a revolving basis. Limits on the level of credit risk by product, industry sector and by country are reviewed and approved quarterly by the Board of Directors.

The exposure to any one borrower including banks and brokers is further restricted by sub-limits covering on- and offbalance sheet exposures, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

The Bank also sets internal credit approval limits for various levels in the credit process and is shown in the table below:

Authority level	Approval limit
Full Board	Above 1,000,000,000
Board, Credit Committee	1,000,000,000
Management Credit Committee	500,000,000
Managing Director	250,000,000
Executive Director	150,000,000

Approval limits are set by the Board of Directors and reviewed from time to time as the circumstances demand. Some other specific control and mitigation measures are outlined below:

(a) Collateral

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are:

- i. Mortgages over residential properties;
- ii. Charges over business assets such as premises inventory and accounts receivable;
- iii. Charges over financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate entities as well as individuals are generally secured. In addition, in order to minimise the credit loss, the Bank will seek additional collateral from the counterparty as soon as loss indicators are noticed for the relevant loans and advances.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured, with the exception of asset- backed securities and similar instruments, which are secured by portfolios of financial instruments.

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

The fair value of any collateral and other security enhancements held against loans and advances to customers and banks is shown below:

	Loans and advances	
	31 December	31 December

Stocks/Shares	3,911,273	7,764,164
Otherwise secured	9,867	967,600
	203,652,670	117,905,238
	========	=======

(b) Master netting arrangements

The Bank further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions. Master netting arrangements do not generally result in an offset of balance sheet assets and liabilities, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if a default occurs, all amounts with the counterparty are terminated and settled on a net basis.

(c) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit - which are written undertakings by the Bank on behalf of a customer authorising a third party to draw drafts on the Bank up to a

stipulated amount under specific terms and conditions - are collateralised by the underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.

(d) Credit concentration

The Bank monitors concentrations of credit risk by sector and by geographic location. An analysis of concentrations of credit risk at the reporting date is shown below:

(v) Credit definitions

(i) Impaired loans and securities

Impaired loans and securities are loans and securities for which the Bank determines that it is probable that it will be unable to collect all principal and interest due according to the contractual terms of the loan / securities agreement(s). These are loans and securities specifically impaired and are graded 7, 8 and 9 in the Bank's internal credit risk grading system.

(ii) Past due but not impaired loans

Loans and securities where contractual interest or principal payments are past due but the Bank believes that impairment is not appropriate on the basis of the level of security / collateral available and /or the stage of collection of amounts owed to the Bank.

(iii) Loans with renegotiated terms

Loans with renegotiated terms are loans that have been restructured due to deterioration in the borrower's financial position and where the Bank has made concessions that it would not otherwise consider. Once the loan is restructured it remains in this category independent of satisfactory performance after restructuring.

(iv) Allowances for impairment

The Bank establishes an allowance for impairment losses that represents its estimate of incurred losses in its loan portfolio. The main components of this allowance are a specific loss component that relates to individually significant exposures, and a collective loan loss allowance, established for groups of homogeneous assets in respect of losses that have been incurred but have not been identified on loans subject to individual assessment for impairment.

(v) Write-off policy

The Bank writes off a loan / security balance (and any related allowances for impairment losses) when Bank Management Credit Committee determines that the loans / securities are uncollectible. This decision is reached after considering information such as the occurrence of significant changes in the borrower / issuer's financial position such that the borrower / issuer can no longer pay the obligation, or that proceeds from collateral will not be sufficient to pay back the entire exposure. For smaller balance standardised loans, charge off decisions are generally based on a product specific past due status.

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

All loans and advances are categorised as either:

Individually impaired

Past due but not impaired

Neither past due nor impaired

The impairment allowance includes allowances against financial assets that have been individually impaired and those subjects to collective impairment.

Exposure to credit risk

Commitments and guarantees

To meet the financial needs of customers, the Bank enters into various irrevocable commitments and contingent liabilities. Even though these obligations may not be recognised on the statement of financial position, they do contain credit risk and are, therefore, part of the overall risk of the Bank.

The table below shows the Bank's maximum credit risk exposure for commitments and guarantees. The maximum exposure to credit risk relating to a financial guarantee is the maximum amount the Bank could have to pay if the guarantee is called upon. The maximum exposure to credit risk relating to a loan commitment is the full amount of the commitment. In both cases, the maximum risk exposure is significantly greater than the amount recognised as a liability in the statement of financial position.

(e) Liquidity risk

Liquidity risk and funding management: the Bank is exposed to two types of liquidity risk;

- 1. Market/Trading Liquidity Risk;-inability to conduct transaction at current market price because of the size of the transaction, this type of liquidity risk comes to play when certain assets cannot be liquidated at short notice due to market illiquidity and
- 2. Funding Liquidity Risk;-inability to access sufficient funds to meet payment obligations in a timely manner. The Management of Liquidity risk arising from funding and trading is very critical to the on-going viability of the Bank. The Board approved Liquidity Risk Management policy framework and the contingency plan for liquidity risk under crises condition are the policy document in place for managing liquidity risk.

The Asset & Liability Committee (ALCO) is responsible for managing the liquidity of the Bank, this function is delegated to the Asset & Liability Management (ALM) department that manage the day-to-day liquidity requirements of the Bank, and also act as secretariat to ALCO. Liquidity risk is assessed by comparing the expected outflows with expected inflows, and liquidity risk arises when there is a mismatch arising between the inflow and outflow, also when there is unexpected delay in repayment of loans(term liquidity risk) or un expectedly high payment outflow(withdrawal/call risk).

In line with the Liquidity risk management framework, the liquidity position is assessed and managed under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and specifically to the Bank. The most important of these is to maintain limits on the ratio of net liquid assets to customer liabilities, to reflect market conditions. Net liquid assets consist of cash, short-term bank placements and liquid debt securities available for immediate sale, less deposit for banks and other issued securities and borrowings due to mature within the next month.

Presented below is the process used in managing liquidity

- Day-to-day funding, managed by monitoring future cash flows to ensure that requirements can be met. This includes replenishment of funds as they mature or are borrowed by customers. The Bank maintains an active presence in money markets to enable this to happen;
- b. Maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any unforeseen interruption to cash flow;
- Monitoring balance sheet liquidity ratios against internal and regulatory requirements (in conjunction with Financial and Regulatory Reporting Department).

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

The table below shows the undiscounted cash flows on the Bank's financial liabilities and on the basis of their earliest possible contractual maturity. The gross nominal inflow / (outflow) disclosed in the table is the contractual, undiscounted cash flow on the financial liability or commitment.

Items with more than 12 months are expected to be Non-current

While there is a negative cumulative liquidity gap for within one year, it does not reflect the actual liquidity position of the Bank as most of the term deposits from customers maturing within one year are historically being rolled over.

(f) Market risks

Market risk is the risk arising from adverse movements in underlying market factors such as interest rates, equities prices, commodity prices and exchange rates. Interest Rate Risk both in the banking book and trading book, and foreign exchange risk are the major market risks borne by the Bank

Market Risks on the trading portfolio are extensively monitored and managed using the following tools; Counterparty Trading limits, Dealer limits, Net Open Position, Maturity Cap limits and Stop Loss Limits. Market risks on the non-trading position are managed and monitored using sensitivity analysis

f(i) Interest Rate

Interest rate risk occurs when there is a mismatch between interest sensitive assets and liabilities. The major objective of interest rate risk management is to minimise reduction in net income and reduction in the bank's economic value of equity resulting from changes in interest rates.

Interest rate risk is managed using static re-pricing gap cumulative analysis, by ensuring that a balanced re-pricing cumulative gap position is maintained in line with the limits set by the board. Repricing Gap reports are prepared to monitor level of compliance, in addition to testing the sensitivity of changes in interest rates to Net Interest Income, while duration analysis is used in measuring and managing interest rate risk in the trading book.

STERLING BANK PLC

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

f(i) Interest Rate Risk - continued

The management of interest rate risk against interest rate gaps limits is supplemented by monitoring the sensitivity of the Bank's financial assets and liabilities to various standards and non-standards interest rate scenarios.

Analysis of the Bank's sensitivity to an increase or decrease in market interest rates, assuming no asymmetrical movement in yield curves and a constant financial position was as follows:

The following table demonstrates the sensitivity to a reasonably possible change in interest rates for the gap between risk sensitive asset and risk sensitive liability for the different maturities Gap of the Bank's earning assets and liability. The sensitivity of the income statement is the effect of the assumed changes in interest rates on the gap position of the different maturities mismatch.

(ii) Foreign currency risk

Foreign currency risk is the risk changes in foreign exchange rate would affect the value of the Bank's assets and liabilities as well as off balance sheet items. This also includes positions in local currency that are indexed to foreign exchange rate. Financial Instruments that are exposed to this risk includes; foreign currency denominated loans and advances, foreign currency denominated securities, future cash flows in foreign currencies arising from foreign exchange transactions.

Exposures to currency risk are consistently monitored by limit structures for overnight and intraday spot and forward limits for dealers and the global position. The Net Open Position limited is strictly monitored to ensure strict compliance with regulatory requirements. In order to avoid risk of loss or breaches of the regulatory limits, daily monitoring and reporting of all foreign currency transactions is in place.

The following table demonstrates the sensitivity to a reasonably possible change in exchange rates for the gap between foreign currency denominated balance for the different currency gap of the Bank's assets and liability. The sensitivity of the income statement is the effect of the assumed changes in exchange rates on the gap position.

(g) Operational Risk Management

Operational risk in the Sterling Bank context is defined as the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. This definition includes legal risks but excludes strategic and reputational risks.

Sterling bank maintains a dedicated function for managing its operational risks with reporting line to Executive Management and Board Risk Management Committee through the Chief Risk Officer as part of a robust governance culture. The Management Risk Committee consisting of Heads of all business functions review operational risk management reports quarterly and define action plans geared towards managing risks to acceptable levels.

The department is open to regular auditing from internal and external auditors, and are taking positive steps towards the implementation of Basel II accord.

The specific objectives of Operational Risk Management in the bank are as follows:

- Creating a minimal surprise environment in STERLING BANK PLC through the reduction of the frequency and impact
 of operational risk incidents.
- Instituting a systematic process and approach for identification, assessment and management of operational risks inherent in people, processes, systems and external factors.
- Defining appropriate measurement metrics to monitor potential impact of operational risks in the Bank's activities and profitability.
- Monitoring and managing risks to minimize the Bank's exposure and losses arising from operational risks.
- Ensuring that risk ownership is established and responsibilities for the management of operational risk events is clearly documented.
- Constantly reviewing internal processes, procedures, products and policies to address the root causes of operational events.

The major methodologies employed in the Bank include:

- Loss data collection and tracking: Internal loss events are captured bank wide and recorded in a database. This aids
 in the tracking of events, determining the impact and frequency of risk events and the profitability along business
 lines.
- 2. Development & monitoring of key risk indicators: Metrics are set by the Operational Risk Management unit in conjunction with the process owners to monitor key risks in the business units that could prevent the achievement of set goals.
- 3. Risk and control self-assessments: A periodic self-assessment of risks and controls by process owners is conducted to evaluate the strength of controls in managing identified risks.

Other methodologies employed in the management of risks include the process mapping technique, the use of audit reports, loss history and the administration of questionnaires.

Operational Risk Management conducts its risk management function independently without compromising on industry/regulatory standards. The bank adopts a bottom-up and a top-down approach to managing operational risks.

(h) Capital management

(i) Regulatory capital

The Bank's lead regulator, the Central Bank of Nigeria, sets and monitors capital requirements for the Bank. The banking operations are directly supervised by the Central Bank of Nigeria. In implementing current capital requirements, Central Bank of Nigeria requires the Bank to maintain a prescribed ratio of total capital to total risk-weighted assets.

The Bank's regulatory capital is analysed into two tiers:

Tier 1 capital, which includes ordinary share capital, share premium, retained earnings, translation reserve and minority interests after deductions for goodwill and intangible assets, and other regulatory adjustments relating to items that are included in equity but are treated differently for capital adequacy purposes.

Tier 2 capital, which includes qualifying subordinated liabilities, collective impairment allowances and the element of the fair value reserve relating to unrealised gains on equity instruments classified as available-for-sale.

Various limits are applied to elements of the capital base. The qualifying tier 2 capital cannot exceed tier 1 capital. There are also restrictions on the amount of collective impairment allowances that may be included as part of tier 2 capital.

Banking operations are categorised mainly as trading book or banking book, and risk-weighted assets are determined according to specified requirements that seek to reflect the varying levels of risk attached to assets.

(ii) Capital Adequacy Ratio

The capital adequacy ratio is the quotient of the capital base of the Bank and the Bank's risk weighted asset base. In accordance with Central Bank of Nigeria regulations, a minimum ratio of 10% is to be maintained.

NOTES TO THE FINANCIAL STATEMENTS - Continued

36 Financial risk management - continued

(iii) Capital allocation

The allocation of capital between specific operations and activities is, to a large extent, driven by optimisation of the return achieved on the capital allocated. The amount of capital allocated to each operation or activity is based primarily upon the regulatory capital, but in some cases the regulatory requirements do not reflect fully the varying degree of risk associated with different activities. In such cases the capital requirements may be flexed to reflect differing risk profiles, subject to the overall level of capital to support a particular operation or activity not falling below the minimum required for regulatory purposes.

Although maximisation of the return on risk-adjusted capital is the principal basis used in determining how capital is allocated within the Bank to particular operations or activities, it is not the sole basis used for decision making. Account also is taken of synergies with other operations and activities, the availability of management and other resources, and the fit of the activity with the Bank's longer term strategic objectives.

NOTES TO THE FINANCIAL STATEMENTS - Continued

38 Fair Value of financial instruments

The Bank's accounting policy on fair value measurements is discussed under note 2.2.7. The Bank measures fair values using the following fair value hierarchy that reflects the nature and process used in making the measurements:

- Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2: Valuation techniques based on observable inputs, either directly (i.e., as prices) or indirectly (i.e., derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: Valuation techniques using inputs that are not based on observable market data, i.e., unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The table below analyses financial instruments measured at fair value into the fair value hierarchy at the end of the reporting period:

31 December 2013	Level 1	Level 2	Level 3	Total
Investment securities	20,307,898	-	1,389,290	21,697,188
	=======	===		=======

The following are the nature of adjustments which will make the 2009 and 2010 financial statements prepared under Nigerian GAAP comply with IFRS in line with IFRS 1:

Classification and measurement of assets and liabilities

Under IFRS, financial assets and liabilities are required to be classified as held for trading at fair value through profit or loss, available for sale, loans and receivables and held to maturity and other financial assets and liabilities. Financial instruments are measured based on their classification. (IAS 32, 39 and IFRS 7- Financial instruments)

a) Short-term investments

Under IFRS, investments are not classified as short-term. Therefore, short-term investments comprising of treasury bills and Discounted Sovereign Debt Note would have been reclassified to investment securities and recognised at amortised cost in line with the Bank's intention and purposes.

b) Pledged Assets

The Nigerian GAAP did not require separate classification of pledged assets and as such they were included in their respective classes under Nigerian GAAP. Under IFRS, IAS 39 requires that collateral provided should be classified separately from other assets when the counterparty has the right to sell or re-pledge the collateral.

(c) Investment Securities

Under Nigerian GAAP, the Bank accounted for investments in unquoted securities as financial instruments measured at cost. Under IFRS, the Bank would have designated such investments as either held for trading, available-for-sale and held to maturity investments in line with the Bank's intention and purposes.

IFRS requires held for trading investments to be measured at fair value with fair value gains and losses charged to profit and loss in the statement of comprehensive income; available-for-sale investments to be measured at fair value with fair value gains and losses impacting equity and held-to-maturity investments are carried at amortised cost and the difference between the instruments amortised cost and Local GAAP carrying amount would have impacted on the equity.

(d) Loans and advances

Impairment of loans and advances:

Under Nigerian GAAP, loans and advances were measured at costs net of impairment losses using an expected loss model. A specific risk provision for loan impairment is established to provide for management's estimate of credit losses as soon as the recovery of an exposure is identified as doubtful. This provision is made for each account that is not performing in accordance with the terms of the related facility. A general provision of at least 1% is made for all performing accounts to recognize losses in respect of risks inherent in any credit portfolio. Under IFRS, an impairment loss can only be accounted for if there is objective evidence that a loss has occurred after the initial recognition but before the balance sheet date. Based on this, individual impairment would have been calculated and charged accordingly, while collective impairment is charged for facilities that are considered performing.

Amortised cost of loans and advances

Under Nigerian GAAP, gross loans and advances are measured at cost using the contractual interest rate. IFRS requires financial instrument classified such as loans and receivables to be measured at amortised cost using effective interest rate which takes into consideration the originating fees and other transaction costs.

STERLING BANK PLC

FIVE-PERIOD FINANCIAL SUMMARY- Continued

(e) Due from other banks

Under Nigerian GAAP, pledged cash are included in 'Due from other Banks'. But under IFRS, pledged assets are disclosed separately from the asset.

(f) Other assets

Under Nigerian GAAP, interest receivables were classified separately from the principal while premium on bonds were recognised under other assets as well. Under IFRS, the interest would have been included in the principal amount. Also, the fair value loss on the initial recognition of staff loans given at below market rate would have been adjusted in other assets.

(g) Other Liabilities

Under Nigerian GAAP, interest payable and unearned interest was presented as separate line items in other liabilities. In line with IFRS, this would have been included in the principal amount, although these changes may not have had significant impact on the profit and loss or equity.

(h) Deposit from banks and customers

The impact of changes in deposits from banks and customers from the Nigerian GAAP to IFRS were mainly attributable to reclassification adjustment to properly distinguish deposits from banks from deposit from customers. These changes may not have significant impact on the profit and loss or equity.

(i) Borrowed funds

Under Nigerian GAAP, borrowed funds are carried at cost. In applying IFRS, these would have been carried at amortised cost. The impact of changes in borrowed funds from the Nigerian GAAP to IFRS would have been mainly attributable to conversion adjustment to properly state borrowed funds at amortised cost.

(j) Adjustment to Equity and Other Reserves

As a result of IFRS adjustment, all impact due to re-measurements of various financial assets and liabilities would have been accounted for in retained earnings.

Movement in other reserves arising from fair value gains or losses recognised on the available for sale financial instruments would have been recognised within other comprehensive income while changes in amount transferred to statutory reserve would have been impacted as a result of changes in IFRS profit.
